# Fire is the source philosophy of every- thing.

FERDINAND HUEMER,  
A MULTIFACETED INNOVATOR.

*At the beginning of the 80s, Ferdinand Huemer recognised the need to free wood-burning stoves from their somewhat outmoded image. He declared his aim was to develop stoves that would not only provide cosy warmth but would also revolutionise design and efficiency - and founded Austroflamm. By March 1983 he had already begun to supply the first stoves. The company grew rapidly and moved to a new building in 1994, particularly as it was now exporting to Australia and Japan. One year later Austroflamm launched the first pellet stove on European soil - one of many other innovations that were to follow.*

*That is the entrepreneur, who with a blend of creativity, zest for action, courage and determination transformed his company into the market leader. Then there is the musician Ferdinand Huemer who plays several instruments, composes and writes – one of*

*his most recent projects being "Masita" - and manages the "Nest" recording studio as a producer. And finally there is the farmer who enjoys an egg for breakfast each morning straight from his own chickens.*

*What unites these three lifestyles is not only the name and the identical physical appearance behind them, but above all one characteristic: passion, expressed through complete commitment and enormous drive to achieve every goal he has set himself.*

*There is no question about it: Ferdinand Huemer dedicates his life to fire and human warmth.*

What matters most: passion, partnership,  
team spirit and human warmth.

The Austroflamm COMPANY PHILOSOPHY is inseparably linked to its founder and owner Ferdinand Huemer. His esprit, his passion for innovation, his visionary thinking and actions are reflected in the way in which the company has evolved. The enthusiasm for unconditional quality and exceptional design is also evident in his employees, leading time and again to trendsetting technological developments. Austroflamm is a TRAILBLAZER in the use of ceramics, has developed novel storage materials such as HMS (Heat Memory System), XTRA storage heat and Keramott, which is protected by patent and produced in-house, and has thus been instrumental in significantly reducing the emission values for solid fuels over the last 25 years. Austroflamm is constantly setting new standards in the industry. Sustainable thinking and acting, team spirit and partnership distinguish the company in its dealings with customers, but also within the team.

Our guiding principle is respect for others because ultimately,  
what really matters in life is human warmth.

# Making NEW DISCOVERIES

WE ARE IN MOTION. WE ARE IN TRANSITION.

We look for solutions, we create awareness.

We strive for innovation, we take responsibility and we reinvent ourselves on a daily basis. We have always been like this and we still are. With new products, in a new guise, Austroflamm continues to embody innovative design and technology that is ahead of its time. Forward-looking, we throw ourselves into new challenges and discard what is outdated, but we remain true to our principles. Esteem for others, family and human warmth are the forces propelling us forward. We have now also been joined by Teresa Huemer, who is enriching our Austroflamm family with fresh ideas. Having grown up in the family business, her career path has led her back to her homeland and to her roots.

Design is our passion,  
quality our promise.

New Austroflamm Logo

"OUR MOST IMPORTANT TEACHER is nature with its play of contrasts: Light and shadow, man and woman, warmth and cold, statics and movement, heaviness and lightness - only contrasts can create the dynamics from which life, emotions and architecture, too, draw their strength."

# Our only teacher must Cesare Monti ever be Nature.

*When I conceive my projects I always try to create a game of opposites.*

Life and emotions, as well as architecture, are born from a contrast between opposites. The dynamism originates both from a static and from a moving component, as well as the contrast between one side in light and the other side in shade, producing the forms and our perception of objects. Masculine and Feminine, Full and Empty, Warm and Cold, Lightness and Weight. Nature and Artifice.

CESARE MONTI, Italian architect and designer. After studying architecture at the Polytechnic University of Turin, he received numerous prizes and awards, including the International Catas Award of 2006 and 1st prize at the Torre Littoria Competition in Turin in 2011. Via Salzburg, he found his way to Linz, where he designs stoves in his studio exclusively for Austroflam.

## OUR PELLET STOVES

State-of-the-art technology for your home comfort.

# The most convenient way to heat.

## PELLET STOVES

Our pellet stoves are not only beautiful to look at, their inner qualities will also impress you. Convenient, simple to operate and at the same time environmentally friendly, pellet stoves offer the perfect alternative to conventional wood-burning stoves. All Austroflamm pellet stoves are fitted for balanced flue operation as standard. Automatic self-cleaning cycles and particularly clean combustion with low ash generation ensure cleaning efforts are kept to a minimum.

### REAL FIRE

At the push of a button, our pellet stoves emit a pleasant warmth and display a unique and calm array of flames thanks to innovative Austroflamm technology.

### REAL PEACE

Thanks to ingenious technology, our pellet stoves do not require convection fans and are therefore particularly quiet during operation.

### REAL CLEANLINESS

Our pellet stoves not only comply with the requirements of European regulations, the values also remain well below the standards to be met. Wood pellets have a minimal impact on the environment even during their production, and energy consumption is kept to a minimum. Cosy heat you can enjoy with a clear conscience.

COMBI STOVES

# THE BEST

OF BOTH WORLDS

LOGS

PELLETS

Austroflamm has the perfect solution for anyone who cannot make up their mind. Our DUO MODELS can be fired with both logs and wood pellets. They combine the comfort and technological innovations of pellet stoves with the naturalness of a crackling fireplace. Low-emission combustion, a renewable raw material and economical heating are all part of the package.

Whether logs or wood pellets, our Duo stoves like both.

OPTIONAL ACCESSORIES  
Would you like a little more?

# Smart Spot

## R O O M S E N S O R

All Austroflamm pellet stoves are equipped with a cable room sensor as standard. The optional SMART SPOT is a wireless room sensor based on Bluetooth technology, which allows you to measure the room temperature in the most convenient spot (within a range of 20 m). The minimalist, timeless design of the sensor is an elegant eye catcher, especially in the premium version.

Premium

White

The sensor is available in a high-quality "Premium" and a subtle "White" version.

### TECHNICAL DATA

Installation: horizontal or vertical

Battery: 2 x AAA batteries (included)

Battery-Life: > 1 year

Reception: Bluetooth

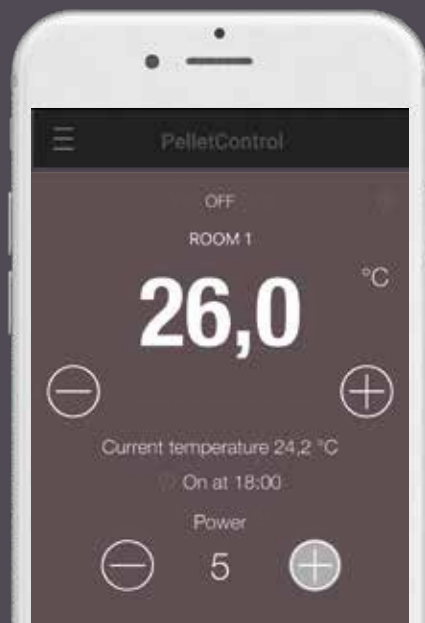

# Air Diffuser Module

Enhance your comfort with little effort. With the optional air diffuser module you can also heat directly adjacent rooms without having to keep the door open all the time.  
(Available for: Clou Duo, Mo Duo, Scotty Duo, Clic, Ruby)

# Intuitive Control

## PELLET CONTROL APP

Now you can enjoy a truly beautiful (pellet) fire at the touch of a button. Gently pressing the TOUCHDISPLAY is all it takes to start pellet delivery, and ignition is fully automatic as well. Alternatively, simply press the REMOTE CONTROL or the Pellet Control app on your smartphone (iOS or Android). This allows you to monitor and control your pellet stove from any location. So you can make sure that it is cosy and warm when you get home. Operation via display, remote control or app is foolproof and self-explanatory. Our Clou, Clou Compact and Clic pellet stoves probably offer the simplest operating concept of all with their innovative ROTARY CONTROLS.

## MAIN SCREEN

The power can be regulated on the main screen. The desired room temperature is displayed in large format. The actual room temperature is shown in small letters beneath it.

## TIMER

A timer can be set just as conveniently via PelletControl as on the display of our pellet stoves. This is an important addition, especially for our models with rotary control. You can set weekly and daily programmes using the “Timer” menu.

## ADDITIONAL FUNCTIONS

- Activation of the ECO mode
- Changes to the restart and shutdown temperature
- Adjustment of the pellet quality from 1-3
- Change of date and time
- Statistics
- Service / maintenance information
- Error log

## COMBI PELLET AND LOG STOVE

The Clou family has grown with the addition of Clou Duo. And it more than lives up to its name because a Clou is not only an unmistakable Austroflamm design. Clou Duo is also a stylish combination unit for wood pellets and logs. It captivates through its pleasant pellet fire with automatic thermostat and timer function, its optional air diffuser module and its striking display of flames darting from the logs.

D U O NEW

M O D U O

## MO DUO COMBI PELLET AND LOG STOVE

### MO DUO

Attention all comfort and pleasure seekers! Mo Duo fulfils all your heating needs in one go. This combination unit can be heated with pellets or logs and so combines the best of both worlds: the comfort of an automatic pellet fire with an automatic thermostat or timer function and the incomparable display of flames produced by crackling logs. With the optional air diffuser module, adjacent rooms can also be heated.

Simple to operate: with the clear display and handy rotary control for your ideal temperature.

LOGS

PELLETS

# SCOTTY DUO NEW

## SCOTTY DUO

Whether you fire our Scotty Duo with logs or wood pellets is entirely up to you. Either way, Scotty Duo provides cosy warmth and an effective heat output. Equipped with state-of-the-art Austroflam technology, heating becomes child's play. Whether by hand or conveniently controlled via the integrated WLAN module, Scotty Duo impresses with its efficiency and versatility. Featuring understated elegance and attractive details, Scotty Duo combines technological innovation with the source - the flame. Whether in rich dark anthracite or bright white, our all-rounder Scotty Duo is guaranteed to be a warming eye catcher in your home.

LOGS

PELLETS

Scotty Duo in dark anthracite with flue pipe connection at the top.

Spoilt for choice? Not so with Scotty Duo: logs or wood pellets, it really doesn't matter.

B E N

The long, yellow flames create a beautiful contrast to the steel cladding.

Pictured left: Ben with a ceramic cladding.

## BEN

Its rounded contours lend it a dynamic appearance. Its cladding made of perforated steel, stainless steel or ceramic highlights this even further. For all its dynamism, Ben is as quiet as a whisper and its flames are pleasantly serene - truly relaxing.

## CLIC

Do you want it to “Clic”? Clic works by itself, just by using the simple rotary control. With the air diffuser module as an accessory, you can even heat other rooms at the same time. You also have a choice of appearance: steel or ceramic.

Your ideal temperature in the twinkling of an eye: the simple rotary control makes it possible.

C L I C

# CLOU

PELLET

## CLOU PELLET

### ONE BUTTON IS SUFFICIENT

The completely new operating concept of Clou Pellet is as unusual as its design: the automatic control is activated, the power setting selected and the stove switched off again by means of a rotary control. It really couldn't be simpler.

## CLOU COMPACT PELLET

## SMALL BUT AWESOME!

Boasting all the advantages of Clou, but with more compact dimensions and a lower output, this is Clou Compact Pellet. In other words, it also features the foolproof rotary control, housed in a stunning design.

# C L O U

COMPACT  
PELLET

## PERCY

Clear, timeless contours in steel or ceramic are what make Percy stand out from the crowd. With its standard full equipment such as a WLAN module, remote control and automatic dumping grate, it has everything you need for maximum heating comfort. And, of course, the long, beautiful, serene pellet flames are also on board.

Individual design: Percy is available with steel or ceramic cladding.

P E R C Y

Sheer bliss is only a push of a button away: the display makes it possible.

## PERRY

Straightforward, stylish and elegant is how our Perry presents itself. The sophisticated ceramic cladding in bright white or dark anthracite gives the automated pellet stove that extra special touch. At the push of a button, Perry provides cosy warmth and fills the room with flickering fire. Equipped with our WLAN module, your smartphone becomes a remote control for your Perry. Whether you want to fill your home with cosy warmth while you are on the road, or set complete daily or weekly programmes, Perry and the pellet app make it possible. A smart heat dispenser for every day.

NEW

POLLY  
2.0 LIGHT

## POLLY 2.0 | POLLY LIGHT THE RIGHT CHOICE FOR EVERYONE

---

### WHICH ONE IS BEST FOR ME?

Polly - likeable, practical, round: Its rounded glass allows a particularly intricate view of the fascinating play of flames. You can choose between the fully equipped Polly and the inexpensive Polly light. In both cases, you have the option of steel, soapstone or ceramic cladding in a range of four colours. Also available with Heat Memory System for heat storage.

## POLLY 2.0 POLLY LIGHT

## RUBY IMPRESSIVELY STYLISH

Ruby with flue pipe connection at the top.

### AN ELEGANT UNDERSTATEMENT IN ITS MOST STUNNING FORM.

The sophisticated design details, from the elegant ceramic cladding to the smart wooden handle, are what make this pellet stove stand out. The imposing, rounded cast iron door creates a spectacular setting for the flames. Depending on individual circumstances, various flue pipe connection options (at the rear or at the top) and an air distribution module are available as accessories.
